

SHUAIB ALAMEEN

AI Researcher | Systems Engineer | Building Intelligent Systems & Real-World Infrastructure, Lagos, Nigeria •
shuaibayomide96@gmail.com • github.com/ayomide20000005 • [LinkedIn](#) • alameen-eight.vercel.app

PROFESSIONAL SUMMARY

AI researcher, systems engineer, and product builder focused on developing intelligent software and scalable infrastructure that solve real-world problems. Published author of two Zenodo-indexed research papers with experience spanning AI systems, geospatial intelligence, retrieval-augmented generation, and production software engineering. Proven ability to take ideas from research to deployment, building AI-powered products, developer tools, and intelligent platforms using Python, Go, JavaScript, PyTorch, and LangChain. Passionate about creating technologies that strengthen research, innovation, and the African startup ecosystem while pursuing a Bachelor's degree in Computer Science.

EDUCATION

Tai Solarin University of Education

B.Sc. Computer Science **2023 – Expected 2027**

ACHIEVEMENTS

Adaption Labs Research Grant

Granted by Adaption Labs, an AI research company founded by Sara Hooker (ex-Google DeepMind, Cohere). San Francisco, 2026

Deep Learning Indaba 2026

Selected Researcher

RESEARCH & PUBLICATIONS

- "Toward a Memory That Does Not Burn" — AI-driven federated framework for knowledge recovery and preservation. Published on Zenodo (DOI indexed): <https://doi.org/10.5281/zenodo.18926211>
- Urban Snake Displacement Risk Index (USDRI) — Quantitative framework for measuring displacement pressure in urbanizing regions. Published on Zenodo (DOI indexed): <https://doi.org/10.5281/zenodo.19245787>
- Programming AI-Guided Language (PAGE) — Conceptual neuro-symbolic AI architecture (in development)

EXPERIENCE

Co-founder | Carilume | Lagos (Hybrid) 2026

- Spearheading the end-to-end architecture and development of an AI-driven search engine.
- Creation of high-performance geospatial systems that ensure data sovereignty.

AI & Big Data Instructor | DOXA Team | Ogun State 2025 – 2026

- Trained students and professionals in AI, ML, and Big Data tools.
- Mentored final-year students on research writing and AI/ML projects.

Product Designer | General Kush | Lagos 2022 – 2023

- Built an internal desktop tool for product visualization and selection.
- Designed a system for matching customer preferences with custom designs.

WordPress Developer (Part-time) | All Tech Computer Institute | Lagos 2021 – 2022

- Developed and maintained WordPress websites with custom themes/plugins.
- Handled updates, backups, and troubleshooting.

TECHNICAL PROJECTS & ACTIVE R&D

- HardPaper — AI research IDE that converts codebases into publication-ready LaTeX papers (Electron, LaTeX, AI, Node.js)
- Access Studio — Offline AI video creation suite with template automation and no-cloud dependency (Electron, React, Remotion, FFmpeg)
- Demis — VS Code extension for standardized development environments across teams (TypeScript, VS Code API, Node.js)
- Boseman — AI geospatial system for satellite-based wildlife displacement detection (Python, Flask, Leaflet, GIS)
- Kuti (NYSC AI Sidekick) — Offline RAG + neuro-symbolic system for automating NYSC mobilization in low-connectivity environments (validated via user surveys; early interest established)
- LifeFlow AI (Emergency Blood Response) — AI matching system and hospital gatekeeper protocol to improve blood access and prevent fraudulent requests in Nigeria (validated via user surveys)

SKILLS & COMPETENCIES

Languages & Databases: Python, Go, JavaScript, SQL, PostgreSQL, MySQL, Redis

AI & ML: PyTorch, TensorFlow, RAG, LangChain, Hugging Face, Scikit-learn

Backend & Cloud: FastAPI, Flask, AWS, GCP

Geospatial & Tools: Leaflet, Google Earth Engine, Electron, FFmpeg, Remotion

LANGUAGES

English (Fluent) • Chinese (Beginner) • ASL (American Sign Language)
